🌐 [Linkdin Profile](#)

👤 [Portfolio](#)

With 3+ years of experience as a Flutter Developer for building fast, scalable, and production-ready mobile applications. I specialize in Flutter & Dart, utilizing advanced state management tools like BLoC, GetX, and Riverpod, alongside real-time technologies such as REST APIs, Firebase, and WebSockets. My expertise spans across location-based services (Google Maps, Mapbox), multimedia apps (video/audio calls, live streaming), and revenue-generating features like AdMob and in-app purchases.

Experience

● 9dot technology inc.

Nov 2025 - Present

Led a team of Flutter developers to build scalable cross-platform apps, providing technical guidance on architecture, code reviews, and state management (BLoC, GetX, Riverpod). Managed sprints and timelines, collaborated with designers and backend teams, and implemented CI/CD pipelines. Also mentored juniors and contributed to key modules to ensure high-quality delivery.

Projects:

- **TrackMyDoc:** Designed for CAs, lawyers, and consultants, TrackMyDoc helps you manage clients, track workflows, automate invoicing, and boost productivity—all in one powerful platform.
 - [AppStore](#) ● [PlayStore](#)
- **HS trader:** HS Trader is your fast, smart mobile platform for trading Forex, Stocks, and CFDs. It offers instant order placement, position management, trading history, dark mode, and powerful charts. With real-time market data and intuitive UI, it ensures seamless trading on the go.
 - [AppStore](#) ● [PlayStore](#)
- **Future school CRM:** Future School CRM is a powerful platform designed to streamline communication and operations between schools, staff, students, and parents. From attendance tracking and homework updates to fee management, online-offline exams and notifications – manage everything in one place with ease and efficiency.

● Codeline Infotech

MAR 2022 - Oct-2025

Developed and maintained cross-platform Flutter apps with scalable, modular code. Managed multiple projects, integrated APIs and third-party SDKs like Firebase and payment gateways, and optimized performance using efficient state management (GetX, Riverpod, BLoC). Ensured clean architecture, local storage handling, and well-documented, maintainable code. Also successfully completed my trainee period, gaining hands-on experience in Flutter development and best practices.

Projects:

- **MY MARATHON:** Integrated multiple REST APIs in the My Marathon, enabling features like property detail retrieval, construction progress updates, payment tracking, and document downloads. Ensured smooth data flow, real-time sync, and handled secure authentication and error management for a reliable user experience.
 - [AppStore](#) • [PlayStore](#)
- **SunEdge Shopping:** Developed a 24x7 shopping app for SunEdge, handling complete frontend development with product listings, order flow, and pickup/delivery options. Integrated PhonePe SDK for secure and seamless payments.
 - [PlayStore](#)
- **Wikitrak:** Built a telematics platform for real-time asset tracking with live maps, trip monitoring, and parameter insights. Integrated Google Maps for live vehicle tracking with geofencing, driver behavior analysis, and alerts.
 - [PlayStore](#)
- **HEGALOAD:** Developed a Flutter app with API backend, focusing on subscription management. Implemented in-app purchases for iOS and Stripe subscriptions for Android. Managed all app data and features based on user subscriptions.
 - [AppStore](#) • [PlayStore](#)
- **LUNABI:** Developed a meditation and bedtime stories app using Flutter and Firebase. Implemented iOS in-app purchases with revenue sharing and managed subscription-based access to songs and content. Handled full frontend and backend integration for smooth content delivery.
 - [AppStore](#) • [PlayStore](#)
- **SIGNBOARDS:** Built a Flutter app with API backend for uploading and managing advertisements in images, videos, and GIFs. Enabled free image uploads and paid video/GIF ads with crypto and card payment integrations. Implemented link sharing that redirects users directly to the app.

Education

- **BCA-Bachelor of Computer Applications** *2017-2020*
 - Maharaja krishnakumarsinhji Bhavanager University
- **MCA-Master of Computer Applications** *2020-2022*
 - Jaipur National University

Skills

- Flutter
- Dart
- iOS
- Firebase
- Git
- State management
- Local database
- Widget testing
